

List N: Disinfectants for Use Against SARS-CoV-2

All products on this list meet EPA's criteria for use against SARS-CoV-2, the virus that causes COVID-19.

The CDC website has "Cleaning and Disinfection for Households" information at <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cleaning-disinfection.html>

"For disinfection, most common EPA-registered household disinfectants should be effective. A list of products that are EPA-approved for use against the virus that causes COVID-19 is available" on the EPA link below.

If you can't find a product on this list to use against SARS-CoV-2, look at a different product's label to confirm it has an EPA registration number and that human coronavirus is listed as a target pathogen.

EPA Reg. No. 12345-12 is on List N, you can buy EPA Reg. No. 12345-12-2567 and know you're getting an equivalent product.

When using an EPA-registered disinfectant, follow the label directions for safe, effective use. Make sure to follow the contact time, which is the amount of time the surface should be visibly wet, listed in the table below. Read our infographic on how to use these products.

These products are for use on surfaces, NOT humans.

Note: Inclusion on this list does not constitute an endorsement by EPA. Additional disinfectants may meet the criteria for use against SARS-CoV-2. EPA will update this list with additional products as needed. List N was last updated on May 7, 2020. Be sure to check the EPA website for the latest information.

I downloaded the spreadsheet on May 7, 2020, from List N: Disinfectants for Use Against SARS-CoV-2 <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

Next, I sorted the file by USE (e.g., Residential) and then by SURFACE TYPE.

In order to make the data fit on an 8.5x11 PDF page, I abbreviated the SURFACE TYPE as follows

FCR	Hard Nonporous (HN); Food Contact Post-Rinse Required (FCR)
FCNR	Hard Nonporous (HN); Food Contact No Rinse (FCNR)
P	Hard Nonporous (HN); Porous (P)
PO	Hard Nonporous (HN); Porous (P) (laundry presoak only)
XHN PP	Porous (P) (laundry presoak only) [there is only one that is not Hard Nonporous]
BLANK	Hard Nonporous (HN) without Porous or Food Contact
